INSTALLATION IN ONE M35A2 CARGO TRUCK,
AND
ONE M105A2 CARGO TRAILER

TB 9-4910-745-30, 16 January 1984, is changed as follows:

1. Remove old pages and insert new pages as indicated below. New or changed material is indicated by a vertical bar to the left of the changed material. Changed illustrations are indicated by a miniature pointing hand highlighting the general area of the change.

Remove Pages

29 through 32
35 and 36

Insert Pages

29 through 32
35 and 36

2. File this change sheet in back of the publication for reference purposes.

By Order of the Secretary of the Army:

CARL E. VUONO
General United States Army
Chief of Staff

Official:

R. L. DILWORTH

Brigadier General, United States Army
The Adjutant General

DISTRIBUTION:

To be distributed in accordance with DA Form 12-21, requirements for FSC
4910: Motor Vehicle, Repair Shop Specialized Equipment.

WARNING

All electrically powered tools and equipment must be grounded prior to use.

*This bulletin supersedes TB ORD 5100-30/3, dated 4 Dec 1958.

1. General

a. The instructions in this bulletin are to be used only as advice and guidance for installation of organizational maintenance automotive maintenance and repair shop equipment (NSN 4910-00-754-0650) in one M35A2 cargo truck, unit 1, and one M105A2 cargo trailer, unit 2.

b. Slight variations to installation instructions may be made in accordance with FM 55-30 at the discretion of the officer in charge.

c. Complete list of items contained in this shop is found in SC 4910-95-CL-A72.

WARNING

All electrically powered tools and equipment must be grounded prior to use.

CAUTION

Special care should be exercised to avoid damage to electrical connectors, wiring, or electrical equipment.

d. Personnel performing this installation should have practical knowledge of electricity.

e. Items not mentioned in this bulletin, that may be components of this shop, may be stowed in cabinets and drawers or secured in such a manner as to avoid damage in transit.

CAUTION

To preserve waterproof characteristics, precautions should be taken not to puncture the outer skin when drilling holes in walls of shop. Coat underside of vehicle body with coating compound (UNDERCOATING TT-C-520, NSN 8030-00-221-1883) where mounting hardware projects through floor.

f. All dimensions, fastener sizes, and hardware sizes are in inches.

g. When entering shop, curbside is at right and roadside is at left.

2. Location of Equipment

a. Locations of equipment to be installed or stowed in units 1 and 2 are referenced in figures 1 thru 14.

b. Refer to table 1 for hardware required for installation.

c. Refer to table 2 for components to be mounted.

d. Refer to table 3 for electrical components to be mounted.

e. Refer to table 4 for drill diameter conversion chart.

2. Location of Equipment--Continued

3. Installation

NOTE

Hand blind riveter (5120-00-973-0376) is used for installing blind rivet nuts in unit floors and walls. Install blind rivet nuts in accordance with MIL-N-47187.

a. Units 1 and 2. Mark and drill twenty-two 0.25-in. diameter holes and install blind rivet nuts (MS27130-A27) in accordance with figures 7 thru 14.

b. Units 1 and 2. Install strap loops as follows:

(1) Install eleven strap loops (MS51939-3) on truck and trailer walls using twenty-two #10 x 1-in. countersunk head machine screws (MS35190-275) for threading into blind rivet nuts.

(2) Install nine strap loops on truck slats using eighteen #10 x 1-1/4-

in. countersunk head machine screws (MS35190-276), eighteen 7/32-in. flat washers (MS27183-42), eighteen #10 (0.190) lockwashers (MS35338-43), and eighteen #10 (0.190) hex nuts (MS35649-202).

(3) Install twelve strap loops on trailer slats using twenty-four #10 x 1-1/4-in. countersunk head machine screws (MS35190-276), twenty-four 1/4-in. flat washers (MS27183-9), twenty-four 1/4-in. lockwashers (MS35338-44), and twenty-four #10 (0.190) hex nuts (MS35649-202).

(4) Install five strap loops on trailer floor using ten #10 x 1-in. countersunk head machine screws (MS35190-275), ten 1/4-in. lockwashers (MS35338-44), and ten #10 (0.190) hex nuts (MS35649-202).

3. Installation--Continued

c. Unit 1. Follow steps 1 thru 25 below; for equipment installation.

(1) Position compressor (4310-00-542-4566) in truck in accordance with dimensions shown in figures 2 and 3. Mark and drill four 0.50-in. diameter holes in truck floor and secure compressor to floor using four 1/2- x 2-in. hex head capscrews (MS90725-115), four 1/2-in. lockwashers (MS35338-48), and four 1/2-in. hex nuts (MS51967-14).

(2) Position 18-drawer storage cabinet (7125-00-357-5337) in right front corner of truck and butt one 11-drawer storage cabinet (7125-00-330-0130) against it in accordance with figure 2. Remove two bottom rows of drawers from storage cabinets. Mark and drill four 0.37-in. diameter holes through storage cabinet bases and truck floor in accordance with figure 3. Secure storage cabinets to truck floor using four 3/8- x 1-1/8-in. hex head capscrews (MS90725-61), four 3/8-in. flat washers (MS27183-13), four 3/8-in. lockwashers (MS35338-46), and four 3/8-in. hex nuts (MS51967-8).

(3) Position 3-kw generator set (6115-00-017-8239) in truck in accordance with figures 2 and 3. Refer to figure 3 for mounting dimensions. Mark and drill four 0.50-in. diameter holes in truck floor and secure 3-kw generator set to truck floor with four 1/2- x 1-1/2-in. hex head capscrews (MS90725-113), four 1/2-in. lockwashers (MS35338-48), and four 1/2-in. hex nuts (MS51967-14).

NOTE

Battery charger (6130-00-940-7866) is part of the 3-kw generator set and does not require separate installation.

(4) Position the two 1.5-kw generator sets (6115-00-889-1466) in truck in accordance with figures 2 and

3. Refer to figure 3 for mounting dimensions. Mark and drill eight 0.37-in. diameter holes in truck floor. Secure the two 1.5-kw generator sets to truck floor with eight 3/8- x 2-1/2-in. hex head capscrews (MS90725-68), eight 3/8-in. flat washers (MS27183-13), eight 3/8-in. lockwashers (MS35338-46), and eight 3/8-in. hex nuts (MS51967-8).

(5) Position oil bucket pump (4930-00-244-4860), grease bucket pump (4930-00-244-4859), and lubricating unit (4930-00-720-4849) in truck as shown in figure 2. Secure all three components to truck wall with one 110-in. retaining strap (7550588-10).

NOTE

Fabricate the 28-in. support angle as shown in figure 23.

(6) Install 28-in. support angle (11021151-1) on truck floor in accordance with figures 2 and 3. Refer to figure 3 for dimensions. Mark and drill five 0.37-in. diameter holes through 28-in. support angle and truck floor. Secure 28-in. support angle to truck floor with five 5/16- x 1-1/4-in. hex head capscrews (MS90725-35), five 5/16-in. lockwashers (MS35338-45), and five 5/16-in. hex nuts (MS51967-5). Position four 12-ton hand hydraulic jacks (5120-00-244-7330) between 28-in. support angle (11021151-1) and compressor (4310-00-542-4566) in accordance with figure 2.

(7) Position tube-pipe fitting kit (4730-00-470-6625) on truck floor in accordance with figures 2 and 3. Using holes in tube-pipe fitting kit cabinet base as a template, mark and drill four 0.25-in. diameter holes. Secure tube-pipe fitting kit to truck floor with four 1/4- x 1-1/4-in. hex head capscrews (MS90725-9), eight 1/4-in. flat washers (MS27183-9), four 1/4-in. lockwashers (MS35338-44), and four 1/4-in. hex nuts (MS51967-2).

3. Installation--Continued

(8) Position one n-drawer storage cabinet (7125-00-330-0130) on left side of truck in accordance with figure 2. Refer to figure 3 for mounting dimensions. Mark and drill two 0.37-in. diameter holes through 11-drawer storage cabinet base and floor of truck. Secure to truck floor with two 3/8- x 1-1/8-in. hex head capscrews (MS90725-61), two 3/8-in. flat washers (MS27183-13), two 3/8-in. lockwashers (MS35338-46), and two 3/8-in. hex nuts (MS51967-8).

(9) Position hand truck (3920-01-113-0117), including one acetylene cylinder (8120-00-268-3360) and one oxygen cylinder (8120-00-151-9758), in accordance with figure 2. Secure hand truck to truck rack (slats) with two 24-in. retaining straps (7550588-5).

(10) Position blacksmith's anvil (5120-00-180-2885) in accordance with figure 2. Secure blacksmith's anvil to the hand truck with 60-in. retaining strap (7550588-2).

(11) Position filler and bleeder (4910-00-273-3658), liquid measure (7240-00-255-5996), and one acetylene cylinder (8120-00-268-3360) in accordance with figure 2. Secure all three components to truck wall with two 72-in. retaining straps (7550588-1).

(12) Mark and drill four 0.37-in. diameter holes in truck slats in accordance with figure 7. Install four 3/8- x 10-in. squareneck bolts (MS35751-93), eight 13/32-in. flat washers (MS27183-14), four 3/8-in. lockwashers (MS35338-46), and eight 3/8-in. hex nuts (MS51967-8).

(13) Hang two electrical power cable assemblies (6150-00-682-3460), special purpose cable assembly (2920-01-027-0125), and special purpose cable kit (2590-00-148-7961) on squareneck bolts (MS35751-93) in accordance with

figure 2 and secure with two 24-in. retaining straps (7550588-5).

(14) Hang five rubber hose assemblies (4720-00-356-8557) on squareneck bolt (MS35751-93) in accordance with figure 2 and secure with 48-in. retaining strap (7550588-3).

(15) Stow pinch bar (5120-00-224-1372) and two crowbars (5120-00-224-1390) between compressor legs in accordance with figure 2.

(16) Secure dispensing pumps (4930-00-287-8293 and 4930-00-263-9886) to top slat, right rear of truck, using two 24-in. retaining straps (7550588-5) in accordance with figure 4.

(17) Mark and drill four 0.25-in. diameter holes in top of 18-drawer storage cabinet in accordance with dimensions shown in figure 3. Secure two strap loops (MS51939-3) to 18-drawer storage cabinet top using four #10 x 1-in. flat head wood screws (MS35492-78).

(18) Position spark plug cleaner (4910-01-064-7313) on top of 18-drawer storage cabinet as shown in figure 2. Secure spark plug cleaner to 18-drawer storage cabinet with 92-in. retaining strap (7550588-7).

(19) Mark and drill four 0.25-in. diameter holes in front of 18-drawer storage cabinet in accordance with dimensions shown in figure 4. Secure two strap loops (MS51939-3) to 18-drawer storage cabinet using four 3/16- x 13/32-in. blind rivets (MS20601-MP6W4).

(20) Position tool box (5140-00-315-2758) as shown in figure 2 and secure tool box to 18-drawer storage cabinet with 92-in. retaining strap (7550588-7).

3. Installation-Continued

(21) Secure disk sander (5130-00-857-8526) to top slat of truck rack using 24-in. retaining strap (7550588-5) in accordance with figure 2.

(22) Position utility grinding machine (3415-00-517-7754) on top of 11-drawer storage cabinet in accordance with dimensions shown in figure 2. Using utility grinding machine base as a template, mark and drill three 0.37-in. diameter holes through n-drawer storage cabinet top. Secure utility grinding machine with three 5/16- x 2.00-in. hex head capscrews (MS90725-40), three 5/16-in. flat washers (MS27183-11), three 5/16-in. lockwashers (MS35338-45), and three 5/16-in. hex nuts (MS51967-5).

(23) Position machinist's vise (5120-00-293-1439) on 11-drawer storage cabinet top in accordance with dimensions in figure 2. Using machinist's vise base as a template, mark and drill four 0.50-in. diameter holes through 11-drawer storage cabinet top. Secure machinist's vise to 11-drawer storage cabinet top with four 1/2- x 2-3/4-in. hex head Capscrews (MS90725-118), four 1/2-in. flat washers (MS27183-17), four 1/2-in. lockwashers (MS35338-48), and four 1/2-inch hex nuts (MS51967-14).

(24) Position generator test set (4910-00-092-9136) and tachometer-dwell test set (4910-00-788-8549) on top of tube-pipe fitting kit in accordance with figure 2. Secure test sets to truck wall with 72-in. retaining strap (7550588-1).

(25) Position separator (4940-00-242-4100) centered on top slat of truck rack in accordance with dimension in figure 2. Using separator base as a template, drill two 0.12-in. diameter pilot holes in slat. Secure separator bracket to slat with two #14 x 7/8-in. round head wood screws (MS35493-102), and two 1/4-in. lockwashers (MS35338-44).

d. Unit 2. Follow steps 1 thru 12 below for equipment installation.

NOTE

Fabricate the 74-in. support angle as shown in figure 23.

(1) Position 74-in. support angle (11021151-2) on trailer floor in accordance with figure 9. Refer to figure 10 for dimensions. Mark and drill thirteen 0.31-in. diameter holes through 74-in. support angle and trailer floor. Secure 74-in. support angle to trailer floor with thirteen 5/16- x 1-1/4-in. hex head capscrews (MS90725-35), thirteen 5/16-in. lockwashers (MS35338-45), and thirteen 5/16-in. hex nuts (MS51967-5).

(2) Stow the six motor vehicle trestles (4910-00-262-0392) between 74-in. support angle and front wall of trailer, as shown in figure 9.

(3) Position hydraulic jack kit (5120-00-595-8388) against 74-in. support angle (11021151-2) and 18 inches from left side of trailer. Refer to figure 9 for dimensions and location.

(4) Position three oxygen cylinders (8120-00-151-9758) in trailer as shown in figure 9. Refer to figure 12 for mounting dimensions. Secure oxygen cylinders to trailer wall and rack with six 36-in. retaining straps (7550588-4) in accordance with figure 11.

(5) Position mechanic's creeper (4910-00-251-6981) on top of trailer right side wheel well as shown in figure 11 and secure to trailer wall with two 92-in. retaining straps (7550588-7).

(6) Position tool box (5140-01-119-2516) on top of trailer left side wheel well as shown in figure 13 and secure to trailer wall and floor with two 92-in. retaining straps (7550588-7).

3. Installation--Continued

(7) Position four 20-ft extension lights (6230-00-268-9436) and two 25-ft extension lights (6230-00-729-9259) on trailer rack in accordance with figure 9. Secure to top slat on trailer rack with two 24-in. retaining straps (7550588-5).

(8) Position case of impact wrench set (5120-00-961-9813) on trailer floor in accordance with figure 9. Secure to trailer floor and wall with 92-in. retaining strap (7550588-7).

(9) Position wheel lift truck (4910-00-554-5983) in trailer as shown in figure 9. Move wheel lift truck forward against the box for hydraulic jack kit (5120-00-595-8388) and secure with two 24-in. retaining straps (7550588-5).

(10) Position two acetylene cylinders (8120-00-268-3360) in trailer as shown in figure 9. Secure to trailer wall with 36-in. retaining strap (7550588-4).

(11) Position eye wash fountain (4240-00-551-3134) in trailer as shown in figure 9. Secure to trailer wall with 30-in. retaining strap (7550588-8).

(12) Position radiator filling can (7240-00-499-8028) in trailer as shown in figure 9 between trailer wall and motor vehicle trestles.

e. Unit 1. Follow steps 1 thru 13 below; for electrical component installation.

(1) To provide sufficient head room for personnel to work in the M35A2 cargo truck, raise the bows 18 inches and drill ten 0.43-in. diameter holes through bow sockets and bows. Secure bows in place with ten 7/16 x 1-3/8-in.

hex head capscrews (MS90725-88), ten 7/16-in. lockwashers (MS35338-47), and ten 7/16-in. hex nuts (MS51967-11).

(2) Position switch box (5930-00-194-9086) on the two top slats of truck body in accordance with figure 16. Using hole of switch box as a template, mark and drill four 0.12-in. diameter pilot holes. Secure switch box to truck racks with four 1/4- x 7/8-in. thread forming screws (MS51861-69).

(3) Install electrical power cable assembly (4910-00-800-1405) through box connector in bottom of switch box and connect to circuit breaker inside switch box.

(4) Position four lampholder junction boxes (5975-00-440-2703) on inner side of second and fourth bows as shown in figure 15. Mark and drill eight 0.12-in. diameter holes and secure lampholder junction boxes to bows with eight #10 (0.190) x 7/8-in. thread forming screws (MS51861-49).

(5) Position four duplex junction boxes (5975-00-281-0090) on bows as shown in figures 16 and 17. Mark and drill eight 0.12-in. diameter holes and secure duplex junction boxes to bows with eight #10 (0.190) x 7/8-in. thread forming screws (MS51861-49).

(6) Remove two knockout slugs from each lampholder junction box (5975-00-440-2703) and each duplex junction box (5975-00-281-0090) in line with bows. Install sixteen strain relief box connectors (5975-00-926-0590) in the junction boxes and install jam nuts on strain relief box connectors.

(7) Make up four power cable assemblies (11021163, 11021164, 11021165, 11021166) in accordance with figures 19 thru 22 and install in accordance with figures 16, 17, and 18.

3. Installation--Continued

(8) Install a 14-foot length of flexible cord (6145-00-295-0855) through duplex junction boxes and lampholder junction boxes on second and third bows. Refer to figure 18. Strip a 3-inch length of outside insulation from flexible cord on inside of each junction box. Strip 1 inch of insulation from each individual wire and twist wire to fit terminal lug (MS20659-141). Install and crimp terminal lug in place.

(9) Connect three wires to lampholder (GE-5740-7) and secure to lampholder junction box. Repeat this step for remaining three lampholder junction boxes. Refer to figures 16 and 17.

(10) Install four duplex receptacles 5935-01-058-9265) by stripping 3 inches of outside insulation from flexible cord. Strip 1 inch of in-

ulation from each individual wire and twist wire to fit terminal lug (MS20659-141). Install terminal lug and crimp. Connect wires to duplex receptacles and secure duplex receptacles to duplex junction boxes with screws provided with duplex receptacles.

(11) Install four duplex junction box covers (5975-00-682-0357) to duplex junction boxes and secure with screws provided in covers. Refer to figure 16.

(12) Tighten all strain relief box connectors to secure flexible cords in junction boxes and switch box. Refer to figure 16.

(13) Secure power cable assemblies to bows and truck rack with twenty-eight 12.00-in. tiedown straps (MS3367-3) in accordance with figures 15, 16, and 17.

The Metric System and Equivalents

Linear Measure

1 centimeter = 10 millimeters = .39 inch
 1 decimeter = 10 centimeters = 3.94 inches
 1 meter = 10 decimeters = 39.37 inches
 1 dekameter = 10 meters = 32.8 feet
 1 hectometer = 10 dekameters = 328.08 feet
 1 kilometer = 10 hectometers = 3,280.8 feet

Weights

1 centigram = 10 milligrams = .15 grain
 1 decigram = 10 centigrams = 1.54 grains
 1 gram = 10 decigrams = .035 ounce
 1 dekagram = 10 grams = .35 ounce
 1 hectogram = 10 dekagrams = 3.52 ounces
 1 kilogram = 10 hectograms = 2.2 pounds
 1 quintal = 100 kilograms = 220.46 pounds
 1 metric ton = 10 quintals = 1.1 short tons

Liquid Measure

1 centiliter = 10 milliliters = .34 fl. ounce
 1 deciliter = 10 centiliters = 3.38 fl. ounces
 1 liter = 10 deciliters = 33.81 fl. ounces
 1 dekaliter = 10 liters = 2.64 gallons
 1 hectoliter = 10 dekaliters = 26.42 gallons
 1 kiloliter = 10 hectoliters = 264.18 gallons

Square Measure

1 sq. centimeter = 100 sq. millimeters = .155 sq. inch
 1 sq. decimeter = 100 sq. centimeters = 15.5 sq. inches
 1 sq. meter (centare) = 100 sq. decimeters = 10.76 sq. feet
 1 sq. dekameter (are) = 100 sq. meters = 1,076.4 sq. feet
 1 sq. hectometer (hectare) = 100 sq. dekameters = 2.47 acres
 1 sq. kilometer = 100 sq. hectometers = .386 sq. mile

Cubic Measure

1 cu. centimeter = 1000 cu. millimeters = .06 cu. inch
 1 cu. decimeter = 1000 cu. centimeters = 61.02 cu. inches
 1 cu. meter = 1000 cu. decimeters = 35.31 cu. feet
